

Frequently Asked Questions (FAQs)

Annual Report Fiscal Year 2018–19

First 5 California (F5CA)

First 5 county commission staff have asked the following questions about annual reporting for FY 2018–19. To pose additional questions or to ask for clarification, please send an e-mail to annualreport@ccfc.ca.gov.

1. Is it possible to add in “other” for the Program Model if none of the available choices is applicable?

“Not Applicable” is what will be used this year to indicate a program model not otherwise listed. The Program Models list was redesigned with the assistance of the First 5 Association prior to approval by commissioners. You can select “Not Applicable” and write text in the Program Models/Initiatives Description if you want to define a specific local project. F5CA does not anticipate making changes to the list of Program Models provided.

2. We fund a number of agencies in Result Area 2: Quality Early Learning Support that Quality Counts California as the Program Model does not clearly describe the services provided. Is that the only choice of Program Model or should we leave it blank as this is an optional field?

Select “Not Applicable” and describe in Program Models/Initiatives Description.

3. Where does the *Kit for New Parents* fit?

Select Service Category: General Family Support, Grantee Type: First 5 County Commission, Program Model: Not Applicable, then describe in Program Models/Initiative Description.

4. In Result Area 3: Improved Child Health, Perinatal and Early Childhood Home Visiting, and Prenatal and Infant/Toddler Pediatric Support include Local Model options in the Program Model section. Are these the only two service categories where a Local Model is appropriate to be included?

If another Service Category does not list your program model, you can enter under “Not Applicable” and include a description of your model.
